

# Level 2 NVQ Diploma in Steel fixing

This qualification is suitable for those that use steel bars and mesh in reinforced concrete to strengthen buildings and other big structures. Steel fixers decide on size, shape and number of reinforcing steel bars and what mechanical equipment to use such as cutting and bending equipment to fix the steel in place.

Steel fitters work mainly on industrial and commercial developments, blocks of flats and large-scale building work such as roads, tunnels and bridges. Sometimes they help manufacture reinforced concrete in a factory.

## Topics covered within the qualification

- Conforming to General Health, Safety and Welfare
- Conforming to Productive Working Practices
- Moving, Handling and Storing Resources
- Cutting and Bending Reinforcement Steel to Shape
- Fixing Steel in Situ
- Prefabricating Reinforcement Steel Sections
- Slinging and Hand Signalling the Movement of Suspended Loads
